SENSOURCE

Analyze museum visitor engagement

Count, analyze, and control museum flow with innovative sensors to improve visitor experience.

The **Easiest and Most Accurate** Way to Count Guests

SenSource technologies are used by museums to analyze and understand visitor traffic patterns, enabling more efficient operational decisions, exhibit placement, and event scheduling.

People counting sensors count foot traffic at entrances as well inside the museum to determine most popular areas. The system is expandable to include new features such as real-time occupancy and visitor journey, securing your investment well into the future.

97% or greater accurate people counting data, guaranteed

Analyze, report and share data with Vea Reporting Platform with API

More than just people counting, expand your solution with visitor journey
