SENSOURCE

University Space Utilization Sensors

Evaluate campus space utilization metrics at your university with SenSource people counting technology.

Definitive Data to Make Strategic Decisions

SenSource technologies are used by universities to evaluate facility usage such as within the rec center, student union, dining hall and library.

Data from the automated people counting sensors help to justify funding requests, realize expansion needs, align staff schedules and more.

The system is expandable to include new features such as real-time occupancy monitoring.

97% or greater accurate people counting data, guaranteed

Analyze, report and share data with Vea Reporting Platform with API

More than just people counting, expand your solution with occupancy monitoring
